INSTALL DTF R2R FIRMWARE

This is a guide how to install the DTF R2R firmware after the conversion of a GTXpro (Bulk) to a GTXpro (Bulk) Roll.

INSTALLATION BY USB STICK

The GTXpro must be switched on and completely booted.
Connect the USB-stick to the printer.
Only use the enclosed USB-stick! Do not reproduce this stick.

Go to the advanced menu.
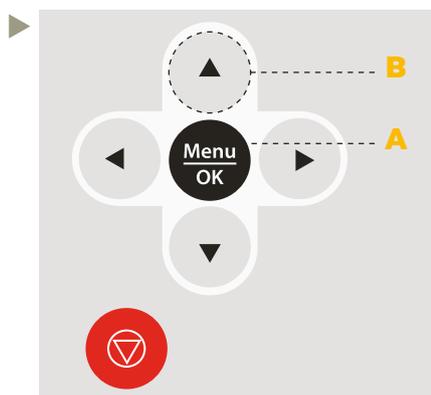

**A:** Press Menu/OK on the operation panel to enter in the Menu.
**B:** Press once

Choose FIRMWARE UPDATE
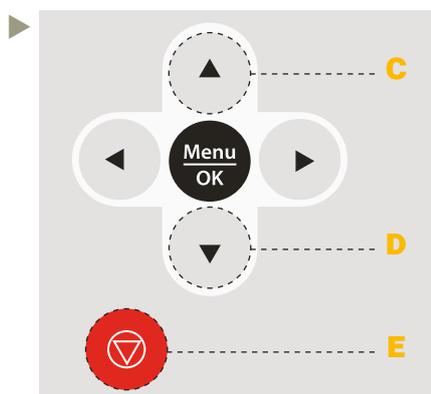

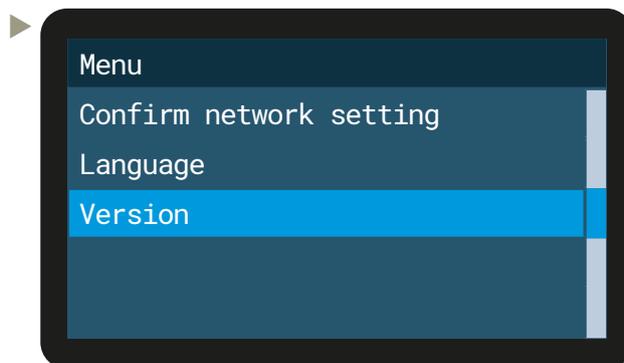

C: Press and hold
D: Press and hold
E: Press and hold

F: Press once
G: Press once

Firmware Update

GTX4aFIRM_R2R_0160_8042.bwf
Press OK to Start
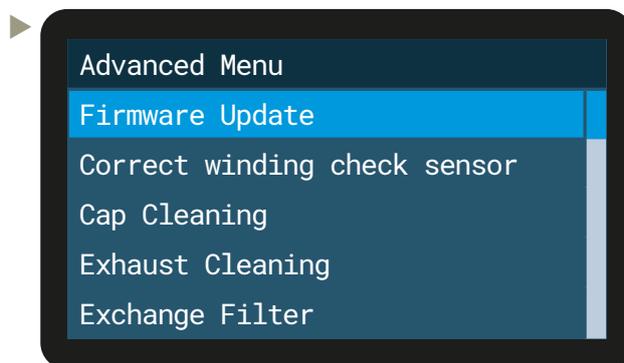

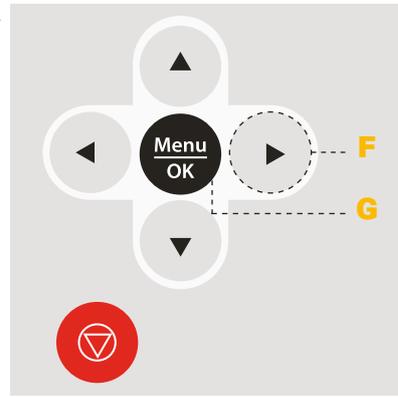

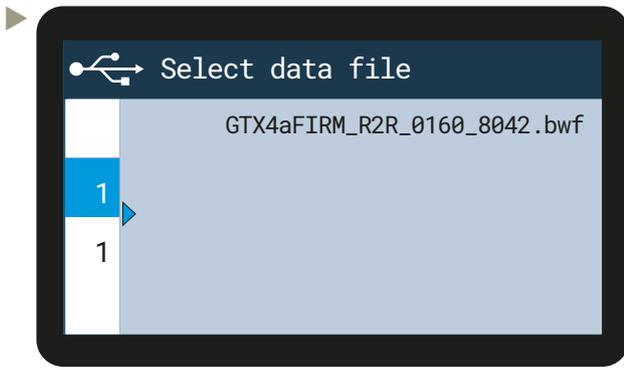

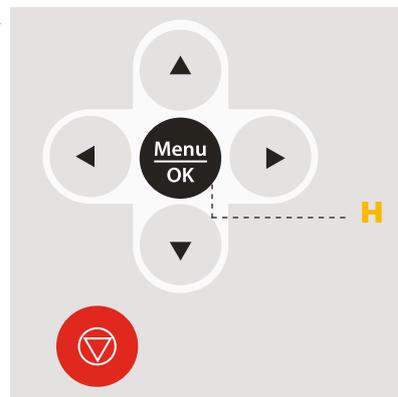

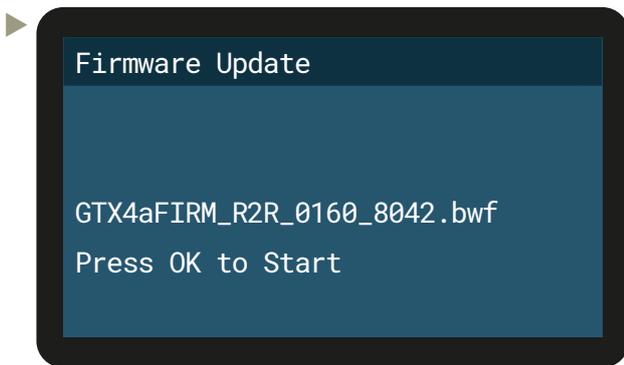

H: Press once

Wait until the installation is done. Do not touch the stick during installation.
Then turn the printer off and on again. Now remove the USB-stick.
