

GTX600 3" GRIPPER KIT INSTRUCTIONS

Items Needed for Installing GTX600 Gripper Kit:

GTX600 3" Gripper Kit - #GRIP3BOX

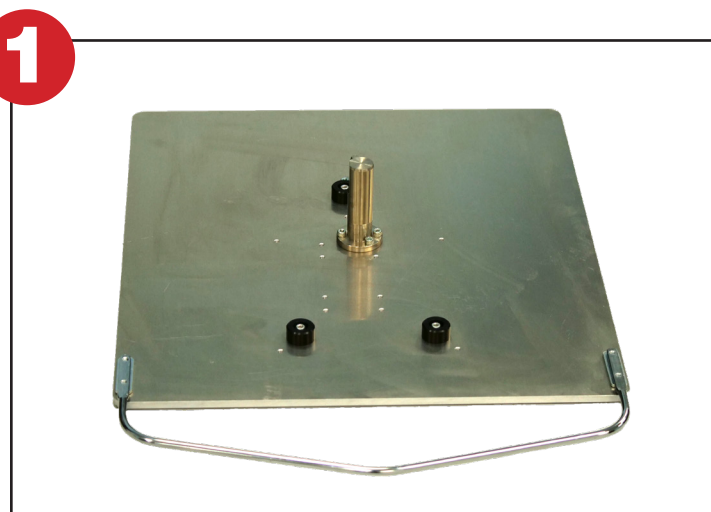

1. Two (2) 3" Gripper Channels

Youth Gripper Kit - #GRIPY

1. Four (4) 9" Gripper Channels

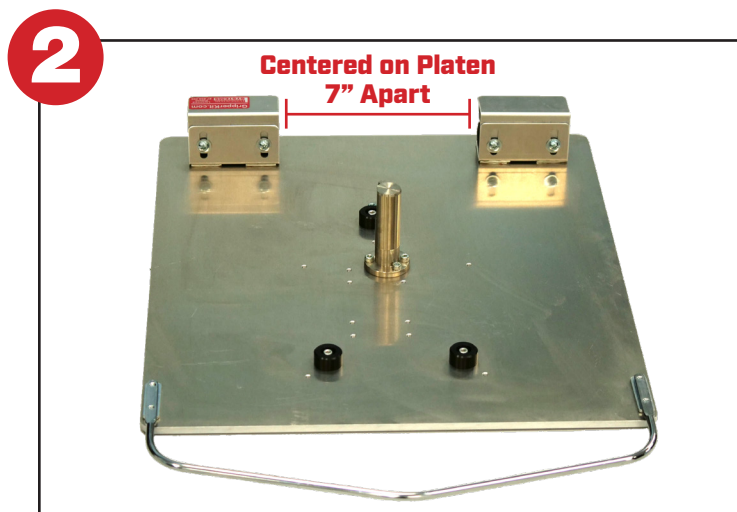

Instructions for installing Gripper Kit:

Below are instructions for installing the Gripper Kits on your GTX600 14"x16" Platen.

Step 1:

Flip the platen upside down on a flat surface. Remove the Protective Wrapping from the Gripper Channels included in a #GRIP3BOX set and a #GRIPY set.

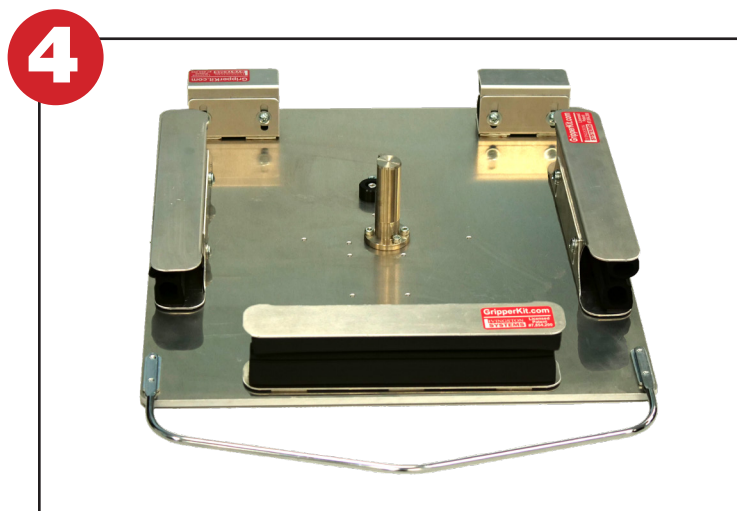

Step 2:

Using a #GRIP3BOX set, ensure that the two 3" Gripper Channels are centered on the platen, are 1/4" from the platen edge and are at least 7" apart so that they clear the Platen Stem Mechanism when the platen is installed on the machine.

Step 3:

Mark the position of the Gripper Channels on the platen with a marker after positioning them correctly. Remove the backing from the Adhesive Tape Foam and adhere the two 3" Gripper Channels to the platen.

Step 4:

Using a #GRIPY set, place and center three of the four 9" Gripper Channels on the remaining sides of the platen 1/4" from the edge. Mark the location and remove the backing from the Adhesive Tape Foam and adhere to the platen.
