

GRIPPER KIT INSTRUCTIONS

Items Needed for Installing Gripper Kits:

Adult Gripper Kit - #GRIPA

1. Two (2) 9" Gripper Channels
2. Two (2) 15" Gripper Channels

Youth Gripper Kit - #GRIPY

- Four (4) 9" Gripper Channels

Oversized Gripper Kit - #GRIPO

- Four (4) 15" Gripper Channels

Instructions for installing Gripper Kits:

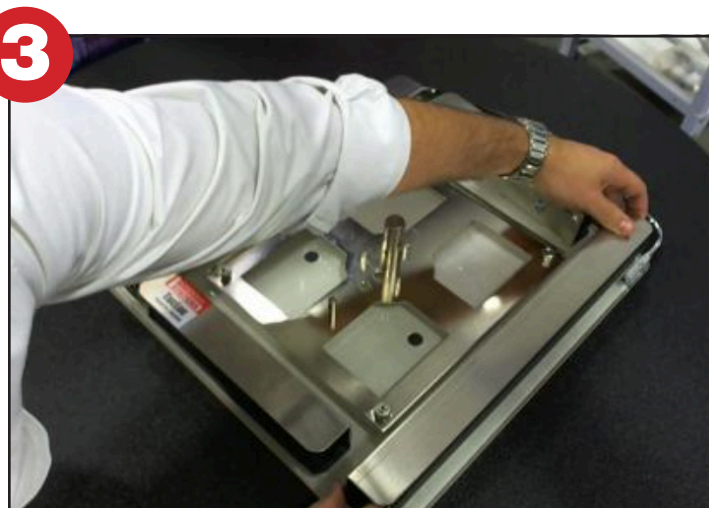

Below are instructions for installing the Adult Gripper Kit on a Brother DTG Printer Platen. The same steps apply to installing gripper kits on Youth and Oversized Platens, but the size of the Gripper Channels will all be the same and not overlapping as on the Adult Platen.

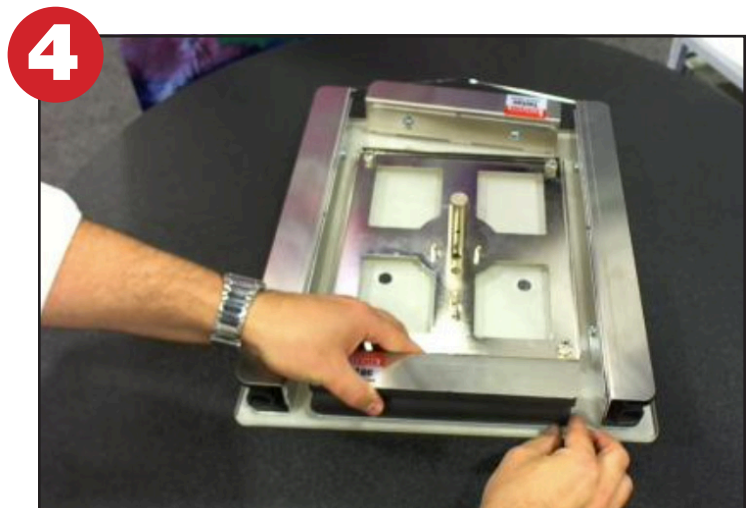

Step 1:
Remove the protective wrapping from Gripper Channels.

Step 2:
Remove the backing from the adhesive foam tape.

Step 3:
Place the side 15" Gripper Channels just inside the Hoop Ring and down the side of the Adult Platen. Ensure the side Gripper Channels are installed approximately 1/4" from the edge of the platen.

Step 4:
Center the front and back 9" Gripper Channels between Side Gripper Channels. Ensure the front and back Gripper Channels are installed approximately 1/4" from the edge of the platen.
